

To assure that perfect fit for your custom window treatments it is recommended that you have a professional measurement of your windows completed. However, this is not a necessity. You can do this yourself by filling out this simple form. Print it out for your own records, then [e-mail](#) or fax to Lisa LaChance at Something Sew Unique (830-214-0020). We can then begin to calculate the yardages needed to complete your project. Each project is unique and depending on the style may not necessarily require all of the measurements below.

Location of Window:

- a) Window width, including frame
- b) Length of window from top of frame to top of sill
- c) Inside width of window
- d) Inside length of window
- e) Distance from top of frame to ceiling
- f) Distance from bottom of sill to floor
- g) Distance from left side of frame to wall
- h) Distance from right side of frame to wall
- i) Length from top of frame to floor
- j) Length from ceiling to floor
